

## Frequently Asked Questions (FAQ)

### WHAT IS THE SOURCE?

*Allqua* is 100% natural alkaline water that comes from natural alkaline underground springs in Meriwether County, Georgia. The springs are naturally pressurized meaning we are not pumping or interfering with the natural flow.

### HOW DO YOU TREAT THE WATER?

We do not artificially enhance or alter our water. Our water is so pure that it is completely safe to drink directly from the spring. However, we do run our water through a series of micron filters and ozonation to remove any natural sediment that may occur.

### HOW OFTEN IS THE WATER TESTED?

Tested daily, our water is meticulously monitored to assure us and you of clear quality and taste in each and every bottle. We value quality of quantity.

### WHAT DOES IT MEAN TO BE “100% NATURAL ALKALINE WATER”?

To be considered an alkaline water the pH level of the solution must be greater than 7.0. *Allqua's* pH level ranges from 7.5 to 8.0 on the scale. 100% natural means that the product is not enhanced with any chemicals or additives. This water is natural and pure! Alkaline water neutralize acids & remove toxins from the body resulting in optimal health.

### IS ANYTHING ADDED TO YOUR WATER?

No. Nothing is added or removed from our water. *Allqua* is 100% all natural.

### DOES BOTTLED WATER HAVE A SHELF LIFE?

While bottled water is not a perishable item, all of our bottles have a “best by” date of two years. We recommend storing your *allqua* water in a cool, dry place, away from direct sunlight to ensure the optimum quality.

### ARE YOUR BOTTLES RECYCLABLE?

Our plastic bottles are made from PET, a material that can be recycled again and again. Recycling of all plastics is an important component of sustainability and something that we strongly encourage and support.

### DO YOUR BOTTLES CONTAIN BPA?

BPA stands for bisphenol A. BPA is an industrial chemical that has been used to make certain plastics and resins since the 1960s that can seep into the contained product. Rest assured, our bottles are BPA-FREE.

### WHAT DOES ALLQUA MEAN?

*Allqua* stands for “ALL QUA-lity” water. We are more than just spring water. We are grateful for Mother Nature’s unique combination of minerals and alkalinity that give our water a well rounded balance of healthy goodness.

### WHAT DOES “WATER WITH BENEFITS” MEAN?

*Allqua* is truly a unique water. Besides a 7.5 or higher pH level, *allqua* contains iron, magnesium, manganese, sulfur and other trace minerals. This special blend of minerals are reported to have many health benefits such as increased energy, blood sugar regulation, help in curbing skin conditions, help with reflux and indigestion and reduced inflammation, head aches, and fighting the aging process.
